

RK 120 Z

Universal sweeping machine for lawn cultivation, cleaning of sunbathing lawns and leaves removal.

Turf sweeping machine for use on almost any turf surface. The sweeping cylinder is equipped with 4 brushes and can be set exactly to sweeping requirements. Brush wear is compensated by readjusting the distance to the baffle plate through the side bearing.

The air flow resulting from the special construction of the RK 120 Z transports the swept debris into the collecting container.

The container can be emptied easily by means of a lever gear. The rear half of the container is folded up and the funnel-shaped container (1,6 m³) can be emptied completely.

TECHNICAL DATA

RK 120 Z

Working width in cm:	120
Drive:	power take-off
Capacity in m ³ (approx.):	1,6
Front tyres:	4.10/3.50-4
Rear tyres:	4.10/3.50-4
Empty weight in kg (approx.):	280
Attachment (semi-supported):	3-point cat. I
Dimensions L / W / H in cm:	260 / 140 / 120
